PICU Essentials was designed as a practical handbook for rotating residents, advanced practice providers and fellows. It is based on 20 years of pediatric intensive care unit, or PICU, practices. While much of the content describes practices or protocols at UF Health Shands Children’s Hospital, it could be applied in most settings. The app is provided free of charge thanks to the Children’s Miracle Network and the University of Florida Department of Pediatrics.

To download the app and learn more, visit the Apple App Store or Google Play.

To transfer a pediatric patient, call 1.800.X.TRANSFER (1.800.987.2673).
